

Paying with Electronic Gift Cards (from RaiseRight)

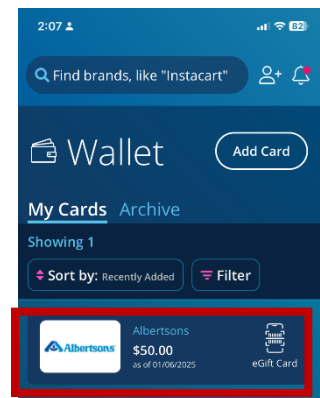

Once you have purchased an electronic gift card from RaiseRight, you can spend it! The first time doing so is a little tricky, so here is a guide.

You'll need to have the RaiseRight app installed on your phone before we start.

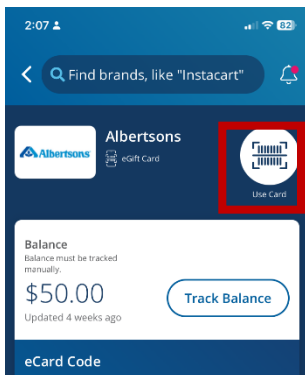

Bring your phone with you to the checkout counter of the store you have purchased the electronic gift cards from. Log in to the RaiseRight app. At the bottom menu, click Wallet.

All the cards you have purchased with RaiseRight should be listed. Select the relevant card. (See pic at right.)

Click Use Card near the top right of your phone screen. A QR code should display along with your pin number.

In the checkout line, select Pay With Scan or advise the clerk you have a QR code. Scan the QR code (or have the checkout clerk do it). It may take a few times to get it to take. You may also need to show the cashier the Redemption Instructions listed below the QR code.

Remember, you can always purchase a physical card that will be mailed to you. Your physical card is also reloadable.

Thank you for raising money for WCV!
